

FiskInfo

The FiskInfo (FishInfo) service at www.barentswatch.no/fiskinfo is driven by several open data sources hosted by BarentsWatch.

Please notice that the dataset "fishingfacilities" with detailed vesselinformation is NOT considered an open dataset. Separate user registration is required for access to this information and a separate written agreement with the Coast Guard (On behalf of the Norwegian Armed Forces) is required for application developers that want to access this information for testing purposes. Using a regular user account with access to the data is not allowed and may lead to closure of the account.
